

# THE CLARITY SOLUTION FOR: ANOCs

## Benefits

Fast, efficient, flexible ANOC designs

Users can change designs on the fly

Audit trails for history and compliance

Reduces cost and saves time

Customers can opt for electronic delivery

## How can I ensure ANOCs are complaint and timely?

Clarity has a comprehensive solution to produce annual notices of change (ANOCs) for health plans. The process supports the requirements around timeliness and reporting for compliance-driven documents. ANOCs are printed on demand with full color capability to point out pertinent information.

## How it Works

- **Organize.** Within the secure, online application, a data driven process lets clients create ANOC manifests to manage the fulfillment process. A simple, online interface archives previous ANOC versions, creates new designs and stays compliant with distribution requirements.
- **Customize.** Clients can create plan and member specific ANOC templates that are combined with variable data. This approach allows for static plan specific information to be combined with personalized materials such as LIS Riders.
- **Deliver.** Integrated into the process is the development of opt-in sites for members to choose to receive their materials electronically rather than through print and fulfillment, significantly saving printing and postage costs. Reporting on all delivery types and dates is available, including print mail dates and electronic distribution dates to ensure compliance with the Centers for Medicare and Medicaid Services (CMS). Dynamic house-holding of data, when allowed by CMS, allows clients to send common packages (i.e., up to four members in a household can receive one set of printed materials).
